

Sound Insulation Prediction Software

Instructions to Install the update of INSUL from Insul web site

Go to <http://www.insul.co.nz/download.html> and download the file marked <http://www.insul.co.nz/download/setup.exe>

Note that this setup file does not do a full install of INSUL, it only updates existing installations. Before installing this update of INSUL you should close any open applications and log on as a user with sufficient access rights to install programs. This normally means having Administrator rights. You must not be running INSUL when you do this update.

Install INSUL

1. Click on the download button on the Insul website and down load the setup file to your computer.
2. You should now install the update of INSUL by double clicking on the file "Setup.exe".
3. Read the instructions on the Welcome page and click the next button.
4. To choose a particular destination directory for INSUL's files click the "Change" button. To accept the default destination directory click the Next button.
5. Review the installation settings and if correct click the Install button.
6. Click the Finish button.
7. You should check that the executable file (Insul63.exe) has been updated by checking the date of the file. This should be 10 December 2009.
